Cell: 630-768-3154

e-mail: jd@jdbullerreps.comInternet: www.jdbullerreps.com**INFORMATION FOR YOU****WHY CONSIDER THE THESE UNITED STATES MANUFACTURERS, SEE BELOW:**

Why Air-Vac: The only surface-mount and through-hole rework equipment completely capable of all components and all substrates.

My service: Free application evaluation and written solutions for any component, substrate and process. On-site training and machine verification available form the me or the factory at reasonable rates.

Why Lista: The only US manufacture of work surfaces and storage solutions with to fit your needs.

My service: Free application evaluation, CAD design and layout and a quotation to by form the factory. The Arlink product line is the most featured and accessory rich work surface changeable without tools. On-site training and build set up available form the me or the factory at reasonable rates.

Why Fusion: The oldest and most experienced industrial brazing and soldering paste manufacture in the United States.

My service: Free application evaluation, with written proposal form the factory to solve your process material, process material placement application and production automation needs.

Why FSG: A division of the oldest and most experienced industrial brazing and soldering paste, material placement and production automation in the United States. Now provides total responsibility supplier of automating your manual or semi-automatic production or inspection process.

My service: Free application evaluation, with written proposal form the factory to solve your needs.

Why Micro Care: Total cleaning solutions for manual, batch or automatic cleaning.

Providing manual tools, process materials, for any contaminate on any substrate.

My service: Free application evaluation, with on-site demonstration, evaluation of samples and complete written process guides and/or proposals solve all your cleaning needs.

On-site training, process consulting available at reasonable rates.

Why Pace: Total manual and semi-automatic conductive, convective, resistance and infrared soldering, de-soldering rework and repair equipment and fume extraction manufactured in the United States.

Providing Products, Application solution, Consulting/training, and Engineered solutions to fit needs.

My service: Free application evaluation, with on-site demonstration, equipment evaluation, samples and complete written process guides and/or proposals to solve all your soldering needs.

On-site training, test, equipment certification, process consulting available at reasonable rates.
